TOP FINDINGS, 3 OF 5 SNAGS

01 HIGH

Homepage CTA choices make the first action unclear

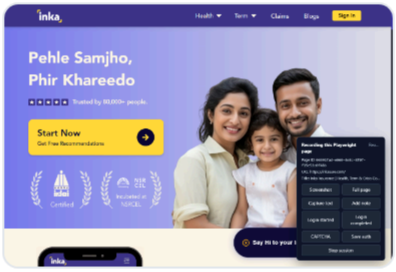

OBSERVED The crawled homepage exposes multiple CTA labels (Start Your Claim Journey, Contact Us, Contact Us); the captured page should make the intended first action visually explicit.

FIX Make the intended next action clear at the affected journey step, then confirm it in the same captured flow.

02 HIGH

Some controls are unclear to people and automated agents

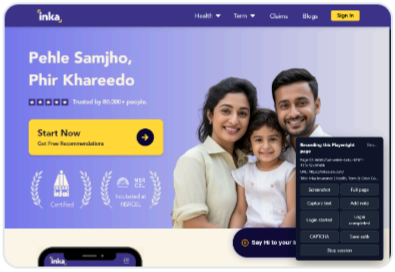

OBSERVED An important clickable control does not explain what it does to screen readers or automated agents.

FIX Give each icon-only or unlabeled control a clear accessible label that describes its action.

03 HIGH

Some controls are invisible to automated agents

OBSERVED An important clickable control does not explain what it does to screen readers or automated agents.

FIX Give each icon-only or unlabeled control a clear accessible label that describes its action.

There are 2 additional Snags and 3 Papercuts beyond this summary; see the In-Depth report for the full evidence.

PRIORITIES · NEXT ACTION

Fix the few issues that change the journey first

FIX FIRST

01 · high impact, medium effort

Make the intended next action clear at the affected journey step, then confirm it in the same captured flow.

02 · high impact, medium effort

Give each icon-only or unlabeled control a clear accessible label that describes its action.

03 · high impact, medium effort

Give each icon-only or unlabeled control a clear accessible label that describes its action.
